

Patty Velez thoughts on her Opponents- Manjul Bose

The message I take from Mr. Bose's statement is: *I worked in the private sector have a business background, so you should vote for me, despite my lack of experience or any demonstrated commitment to CAPS members in the 8 years that I've been a state employee.*

I scoured Manjul's statement to make sure I wasn't somehow missing what his priorities really were, and how he planned to accomplish them. All I could find was "above all, have an open transparent communication with all members". There was not a single identifiable shred of substance to convince me that he has any grasp of the state politics, labor relations, collective bargaining under the Dills act, or how to accomplish anything. No concrete strategies, no specific tactics, nothing.
